PARKING

Parking is available in the Vaughn-Eames lot, in the white-lined areas. The lot is near Morris and North Avenues. Upon receipt of the completed registration form, attendees will be contacted regarding additional parking information.

ADDITIONAL INFORMATION

This symposium is designed for educators and anyone interested in learning the latest information pertaining to autism.

Since the symposium will conclude with a discussion period, attendees are encouraged to bring any questions or concerns relevant to Behavior Models. If desired, questions can be sent along with the registration form prior to the event to be given to the presenters for consideration.

UPCOMING EVENT

We Want YOUR Suggestions!
Please provide us with your topic ideas for our Fall Symposium 2013

Finding Your Way: A Toolbox of Strategies for Creating Behavior Models and working with Challenging Students

April 17, 2013

This interactive presentation will discuss everyday classroom situations. Participants will learn what the functions of behavior are (escape, avoidance, tangible, attention, automatic reinforcement) and how to identify the behavior. Pre-intervention and intervention strategies will be discussed to help avoid further behaviors and to deescalate behaviors in an acting out student. There will also be a focus on enhancing social skills and communication. Scenarios and activities will be used throughout the presentation. Participants will leave the workshop with a toolbox of strategies to use in their schools.
