This requires that educational leaders be willing to examine their own assumptions, beliefs, and practices; understand and apply research; and foster a climate of continuous improvement among all members of the educational staff. Such educational leaders will commit themselves to high levels of personal and organizational performance in order to ensure implementation of this vision of learning.

Standard 2.0 Narrative Explanation: This standard addresses the need for educational leaders to position teaching and learning at the focal point of schools. It accepts the proposition that all students can learn and that student learning is the fundamental purpose of schools. To this end, educational leaders are responsible for ensuring that decisions about curriculum, instructional strategies (including instructional technology), assessment, and professional development are based on sound research, best practice,
school and district data, and other contextual information and that observation and collaboration are used to design meaningful and effective experiences that improve student achievement. Educational leaders must capitalize on diversity to create a school culture that promotes respect and success for all students. All members of the school community should have confidence in the integrity of the decision-making process for school improvement and the appropriateness of that process, thus ensuring dignity and respect for all. Successful educational leaders must be able to identify, clarify, and address barriers to student learning and communicate the importance of developing learning strategies for diverse populations. In addition, this standard requires that educational leaders be learners who model and encourage life-long learning. Educational leaders must use their knowledge of organizations to create a learning environment conducive to the success of all students. Proper allocation of resources such as personnel, facilities, and technology are essential to creating an effective learning environment. Resource management decisions should give priority to teaching, student achievement, and student development.

Also, operational procedures and policies must be established to maintain school safety and security and to strengthen the academic environment. All management decisions, including those regarding human resources, fiscal operations, facilities, legal issues, time management, scheduling, technology, and equipment, should be based on sound organizational practice. Educational leaders must monitor and evaluate operational systems to ensure that they enhance student learning and reflect the school’s and district’s accountability to the community. Skills in job analysis, supervision, recruitment, selection, professional development, and appraisal of staff positions, as well as an understanding of relevant collective bargaining agreements, strengthen the ability to use personnel resources. Effective educational leaders define job roles, assign tasks, delegate appropriately, and require accountability. They also actively seek additional sources of financial, human, and physical support. They involve stakeholders to ensure that management and operational decisions take into consideration the needs of multiple constituencies while at the same time focusing the entire community on student achievement as the ultimate goal. To include stakeholders in management decisions, educational leaders must be competent in conflict resolution, consensus building, group

**Standard 4.0 Narrative Explanation:** This standard addresses the fact that cooperation among schools, the district, and the larger community is essential to the success of educational leaders and students. Educational leaders must see schools as an integral part of the larger community. Collaboration and communication with families, businesses, governmental agencies, social service organizations, the media, and higher education institutions are critical to effective schooling. The ability to analyze emerging issues and trends that might affect schools and districts enables educational leaders to plan effective instructional programs and school services. Effective and appropriate communications, coupled with the involvement of families and other stakeholders in decisions, helps to ensure continued community support for schools. Seeing families as partners in the education of their youngsters, and believing that families have the best interests of their children in mind, encourages educational leaders to involve them in decisions at the school and district levels. Family and student issues that negatively affect student learning must be addressed through collaboration with community agencies that can integrate health, social, and other services. Such collaboration relies on good relationships with community leaders and outreach to a wide array of business, religious, political, and service agencies. Providing leadership to programs serving all students, including those with special and exceptional needs, further communicates to internal and external audiences the importance of diversity. To work with all elements of the community, educational leaders must recognize, value, and communicate effectively with various cultural, ethnic, racial, and special interest groups.
