**Program Description:** This Master's in Applied Behavior Analysis and Autism Spectrum Disorders is rooted in the science of applied behavior analysis (ABA). The master's program is designed for those who are not certified teachers (although teachers are welcome) and would like to pursue becoming a Board Certified Behavior Analyst (BCBA®). At Kean University, you will develop an evidenced-based approach to teaching students with Autism Spectrum Disorder (ASD) and other Developmental Disabilities. You will learn how to design, implement, and evaluate individualized teaching procedures through the use of empirically validated principles of learning and ABA. Master's students will be required to conduct a single-subject research design clinical thesis. The skills acquired in our program will promote best practices and provide graduate students with the skills to improve the quality of life of their learners.

### **Admission Requirements**

In addition to the University's admissions requirements:

- Baccalaureate with a minimum 3.0 cumulative grade point average
- Official transcripts from all institutions attended
- Three Letters of Recommendation (professional experience)
- An appropriate scholarly writing sample
