

Navigating Challenges: Effective Delivery of Health Services in School-Based Settings

Interprofessional practice occurs when multiple service providers from different professional backgrounds provide comprehensive healthcare and educational services by working with individuals and their families, caregivers, and communities to deliver the highest quality of care across settings. Positive outcomes are associated with successful collaborative practice. The program will present the four Interprofessional Educational Collaborative (IPEC) competencies: values and ethics; roles and responsibilities; communication; and teams and teamwork. The learner outcomes include: (a) identify interprofessional competencies; (b) evaluate individual and group experience in interprofessional practice; (c) strategize ideas for positive change in interprofessional practice.

Panelists:

- Administrator from a school district
- Administrator from a special education school
- Technology head from a district
- Social worker
- School nurse
- School psychologist
- Parent representative
