

KEAN
SKYLANDS

**WORLD-CLASS
EDUCATION IN THE
NJ SKYLANDS**

INTRODUCING KEAN SKYLANDS

Kean University's newest campus, Kean Skylands, offers students with associate degrees the opportunity to climb higher and earn world-class, affordable bachelor's degrees on a rural campus that's close to home in Jefferson Township.

Opening in Fall 2019, Kean Skylands sits on 40 acres of pristine land, an hour's drive and a world away from Kean's main campus in Union.

It is like no other campus in New Jersey. You study in a 30,000-square-foot lodge that was a former abbey and has been renovated to house today's classrooms, labs, a gym, student lounges and event space. You can walk through the treetops on the elevated skywalk from the main building to classes in the "treehouse" and a three-level cabin surrounded by nature.

This unique experience comes with the low tuition rates that led to Kean being named the **most affordable university in New Jersey**.

It's a world-class Kean education without a long drive — so you can climb higher toward your goal for a 4-year college degree and still have time for your family, job or both.

Conveniently located near County College of Morris, Sussex County Community College, and Passaic County Community College, Kean Skylands is committed to helping county college graduates make a smooth transition toward earning their bachelor's degrees.

We offer extensive advising, tutoring and additional support services, as well as a vibrant internship and career placement program. If you want an internship, we'll work to make it happen. We are there to help every step of the way.

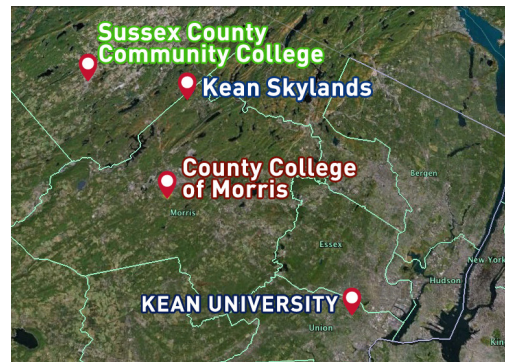

Are you a veteran? Kean was named the most veteran-friendly large school in the nation because of the comprehensive services we provide our former military men and women.

“There is no better way to inspire and teach the environmental biologists of tomorrow than with the forests, rivers and lakes of the Skylands as our lab.”

— Daniela Shebitz, Ph.D., Executive Director and Associate Professor, School of Environmental and Sustainability Sciences

And all of our students benefit from the comprehensive financial aid and scholarship packages that help make your degree so affordable.

KEAN SKYLANDS
Mount Paul, Jefferson, NJ

Kean Skylands offers four degree-completion programs that include a combination of face-to-face and online instruction — all delivered using robust curriculum designed to prepare our students to climb higher in their future careers.

► **B.S. in Biology (Environmental Option):**

Biology is the study of living organisms and the world around us. Students gain a greater understanding of the role science plays in society and prepare for jobs where they can impact our environmental sustainability.

- Research the effects of human activity on biodiversity
- Learn to safeguard the natural world against environmental threats

► **B.A. in Criminal Justice:**

Criminal justice is about upholding the law and keeping the community safe. Students receive immersive training in how to identify new potential safety threats and respond nimbly and swiftly to criminal activity in an ever-changing global environment.

- Gain real-world insight into the American legal system and contemporary issues in policing, corrections, victimology and advocacy
- Practice investigation techniques, including crime scene methodologies

► **B.S. in Management (General Business Option):**

Management professionals harness capital, resources and people to improve the bottom line for businesses of all kinds. Students gain the specific skills demanded in the labor market around the globe.

- Study strategies and trends to make business decisions for corporations, startups and nonprofits
- Understand human resources, supply chain management and other key business functions

► **B.A. in Psychology:**

Psychology embraces all aspects of the human experience — from the functions of the brain to the behavior of nations, from child development to care for the elderly. Students acquire a nuanced insight into how the mind works, which allows them to easily transition from the classroom to clinical and corporate settings.

- Study the diagnosis and treatment of psychological conditions
- Understand consumer behavior and acquire research skills
