PROGRAM OVERVIEW

The McNair Scholars Program is one of eight federally funded TRiO programs. TRiO programs help low-income and first-generation Americans enter college, graduate, and participate in America's economic and social life. Kean University has been selected by the United States Department of Education as one of nearly 180 host institutions to facilitate a McNair Scholars Program. At Kean, the program functions under the auspices of the College of Natural, Applied and Health Sciences.

OUR MISSION

To promote academic excellence at Kean University by preparing low-income, first generation, and traditionally underrepresented students in graduate education for doctoral studies through faculty mentorship, scholarly research and support services.

The McNair Scholars Program is a year-round project comprised of two components: 1) Summer Research Institute (SRI) and 2) Academic Year Component. Once admitted, our scholars are expected to participate in the program until they attain their undergraduate degree. Also, we will monitor our scholars' progress while they pursue their respective doctoral degrees.

SUMMER RESEARCH INSTITUTE

McNair Scholars participate in a Summer Research Institute (SRI). During the summer, participants engage in research with Kean University professors who serve as faculty mentors. Participants take courses designed to strengthen the necessary skills and knowledge for success in graduate study. In addition, the program offers seminars for the graduate admissions process, academic and career counseling, cultural enrichment, personal development workshops and campus visits to graduate schools.

ACADEMIC YEAR COMPONENT

During the fall and spring semesters, McNair Scholars continue their research and participate in our annual symposium, special seminars and other scholarly activities. They also receive assistance in preparing for graduate school entrance examinations, applying to graduate schools, identifying sources of financial aid and completing the admissions process. An exciting aspect of the program is the opportunity for students to expand their classroom experiences and engage in ongoing research internships with a faculty mentor while earning college credits towards their undergraduate degree.

PROGRAM BENEFITS

- Hands-on research
- Research Stipend up to \$2,800
- Application fee waivers at selected institutions
- College credits for ongoing research
- Tutoring and supplemental instruction
- GRE preparation and fee reductions
- Campus visits to graduate school
- Personal coaching and advisement
- Career guidance, resume/CV writing and assistance with application process
- Cultural enrichment and personal development seminars
- Paid travel to professional and research conferences
